

## Repository for the module (AP-Classes)

1. Code for the demos and the exercises is stored in the repository → [M306\\_Text](#), which is on GitHub.
2. Exercises are usually in directories labeled 02\_Exercises.
3. With `git clone [URL]` you can fetch a copy of the repository.
4. If you get a 404 from GitHub, log in to GitHub first.
